REQUEST FOR PROPOSAL: RFP 2018-02 Second Internet and Network Project

Amendment 1: Question and Answer Responses

Pursuant to the process outlined in Section 5.1 of the proposal, this amendment is posted to include all the questions asked prior to the deadline of 2:00p.m. Eastern Time, December 14, 2018. Minor edits have been made to remove identifying information and clarify questions.

Question 1: Please provide more details to elaborate on what you mean by “shared Internet”.

Answer 1: The shared Internet access service would be used by all of the consortium participants. We would prefer that the bandwidth requested be available for dynamic allocation between the participating consortium members. For example, if the consortium were to purchase bandwidth at the 100 Mbps level, and only one library was currently using the Internet, they would have access to all 100 Mbps. If all the libraries were online, the bandwidth would be dynamically allocated among the libraries.
